Pediatri opozarjajo, da zaradi pretirane uporabe tehnologije mladostniki v odrasli dobi ne bodo sposobni živeti. Zaradi pretirane uporabe tudi ne ločijo med realnim in nerealnim. Alarmi so se prižgali že v vrtcih, kjer so opazili, da so nekateri otroci že pri štirih letih zasvojeni z računalniki oz. z novo tehnologijo.
