

Jožef Stefan Institute, Department for Automation, Biocybernetics and Robotics is looking for new researchers,

graduate masters of science for mechanical or mechatronic engineering (f/m)

for the research and development work on the field of

## FACTORIES OF THE FUTURE, ROBOTICS and AUTOMATION.

From candidates, who intend to continue study on a PhD level, we expect innovative, conscientious, professional and independent work on the set of scientific research projects in close collaboration with industry. For the successful candidate precise research program will be defined, based on his interests and abilities. The research work will be conducted in close cooperation with ass. prof. Igor Kovač and with other international staff of researchers, who work in a team, as well as with leading domestic industry. The knowledge on intelligent business management, automation and mechatronics is required, with possible additional skills in the use of software tools for process planning systems. The initial contract will be at the beginning limited to one year with the possibility to extend it after one year.

To apply, you should send a statement of motivation related to above topic (up to one page), a curriculum vitae (with bibliography), scanned transcripts of grades and diplomas or master thesis, and contact information to igor.kovac@ijs.si. Applications will be evaluated as they are received, until position is filled. Successful candidate can start working at JSI as soon as all the paper work is completed.
